

MASTERPUNCH SCREWDRIVERS

EGA Master offers a wide range of screwdrivers for professional use. Among the main models of screwdrivers, we find the **Masterpunch series**, which allows hammering on its upper side thanks to its go-through bar.

1. Go-through bar enables hammering on the screwdriver's upper side.

2. The innovative "non-slip" anti-slippery and magnetic tip system allows an easier and safer positioning of the screwdriver, avoiding undesired slides.

3. Equipped with hexagonal bar for strong tightening with wrenches.
